

“Refresh yourself with an ice-cold bottle or can...”

A New Vending Perspective

Whether you are new to vending or have existing operations; whether your goal is to maximise revenues or improve the environment for customers and employees, Outlook Management will work alongside you to develop a bespoke, turnkey programme that meets all your objectives.

Outlook Management Solutions Ltd. was created to provide brands and end users with an innovative proven and effective, complete management solution.

Outsourcing your vending operations to Outlook Management gives you access to a proven, experienced team that draws on expertise established in every facet of the vending industry. We specialise in developing multi-centre vending programmes on a regional and national basis that have the capability to change and adapt with your requirements.

Our resources place you right at the heart of your programme and ensure the highest level of service is maintained no matter how many locations you have or how diverse your operations.

Recommended Vending Equipment

Outlook Management is pleased to recommend the following equipment supplier:

Crane Merchandising Systems (CMS) are leading designers and manufacturers of vending and beverage dispense equipment. CMS deliver a complete innovative vending solution of hot and cold drinks machines, food merchandisers along with versatile snack and combination models into the market place.

Our Brand Partners

HOW WILL YOU MANAGE YOUR EQUIPMENT?

The chances are that you are not fully benefiting from the new breakthroughs in service and support, technology and branded packages that are now available.

MANAGED EQUIPMENT

Once in place, and for maximum efficiency, all your operations will be managed centrally by us. This means that if you have a query, on any subject, or want to change or expand any aspect of your programme, all you need to do is make one contact and we will ensure you get the response you need – no time wasted.

We will act as your in house vending department, centrally managing all your operations and providing you with the precise reporting and round the clock support required to ensure success.

NON-MANAGED EQUIPMENT

The Outlook Management team will examine every aspect of your existing operations and work with you to build a fresh programme that allows you to take full advantage of these new opportunities.

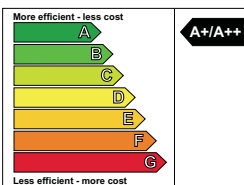

BevMax 4 Cold Drinks

“The best has got even better! BevMax 4 can hold a full range of bottles (both PET and glass) and cans in all popular shapes and sizes. Two models are available further increasing the versatility of the machine.”

Features:

- Market leading product selection to delivery time – the perfect solution for busy vend areas
- Vends 500ml bottles on all trays, increasing product selection
- Dual delivery gates provide shimless vending system allowing multiple size products to be vended
- Reduced energy consumption – EVA EMP ratings of A+/A++
- Low energy LED lighting enhances environmental credentials
- Increased vend reliability – fault rate is 1 in 39,000 vends, driving servicing costs down
- One platform, two sizes = common parts
